Prompt:

A professional, clean Adobe Illustrator style scientific infographic, 16:9 ratio, minimal white background.

Main left section: a pregnant woman in yellow tone (flat vector silhouette style), blood sample tube, circulating fetal DNA fragments, chromosomes (13,18,21,X,Y) with clear labels, risk assessment arrow flow.

Right section:

Bar chart showing invasive prenatal diagnosis (IPD) proportion before and after NIPT (75% → 43%).

Pie chart showing pregnancy outcomes for high-risk DS: 69% termination, 8% live birth, rest ongoing.

Meta-analysis text box with summary numbers.

Bottom section:

World map in rich blue gradient with highlighted 27+ countries (filled with darker blue), clean and bold to emphasize global adoption.

Use vector flat style, soft shadows, Helvetica bold titles, consistent blue-red-gray color palette, high-impact journal figure style.
